JIRA:

Jira Software is an agile project management tool that supports any agile methodology, be it scrum, kanban, or your own unique flavor. From agile boards, backlogs, roadmaps, reports, to integrations and add-ons you can plan, track, and manage all your agile software development projects from a single tool.

JIRA is a bug tracking tool that allows software developers to plan, track and work faster. JIRA is the main source of information for future software release. Developers can plan new features to be added and bugs to be fixed in the next release.

Jira project management includes roadmap where users can create, handle, and visualize epics of their team. It enables you to comprehend what is outstanding and when bugs are scheduled to be fixed. This feature is beneficial for planning large sets of stories across various sprints.

Epic: Epics track collections of related bugs, stories, and tasks.

Story: Stories track functionality or features expressed as user goals.

Bug: Bugs track problems or errors.

Task: Tasks track small, distinct pieces of work.

Sub Task: Subtasks track small pieces of work that are part of a larger task.

Click on create a project

The screenshot shows the Jira 'Your work' page. The 'Projects' dropdown menu is open, and the 'Create project' option is highlighted with a red rectangle. The page includes a navigation bar with 'Your work', 'Projects', 'Filters', 'Dashboards', 'Teams', 'Apps', and a 'Create' button. A search bar is also present. The 'Your work' section displays 'Recent projects' and 'Included free with your plan'.

Click on Select a team managed project

The screenshot shows the Jira project creation wizard. Step 1, 'Project template', displays the 'Scrum' template for 'Jira Software'. Step 2, 'Choose a project type', offers two options: 'Team-managed' and 'Company-managed'. The 'Team-managed' option is selected, and a button labeled 'Select a team-managed project' is visible. A warning message states: 'You'll need to create a new project if you decide to switch project types later.'
